

BARNES EXPLAINS DETAILED PLANS OF EXAMINATIONS

Teachers' Tests to Be Held at
Normal School Here in
June and July.

V. A. Barnes, superintendent of the Marion County schools, is preparing a letter on the official regulations and instructions for teachers' examinations for certificates, which will be held here June 1, 2 and 3, and July 13 and 14.

The notice will be based upon information contained in teacher-training bulletin No. 4, prepared by the division of teacher-training of the State Department of Schools. Robert Clark, supervisor of the division, supervised the work of preparing the bulletin and it has been endorsed by George M. Ford, state superintendent of schools.

The regulations and instructions contained therein are made, according to Supervisor Clark, in the interest of the teachers of West Virginia. The regulations are made with an honest effort to be fair with applicants and to maintain a uniform system of examinations. Some teachers may not see clearly the reasons for some requirements that are made. More than four thousand teachers take the examination each year, representing fifty-five counties. It is necessary to have specific regulations that will apply to situations that may not come within the experience of many teachers. The work, however, must be done according to the "rules of the game." Supervisor Clark says that "we believe the State Department of Education may expect the co-operation and loyalty of all the teachers of West Virginia."

The bulletin is divided into eleven subdivisions and a schedule to be followed at all examinations. The examinations in this county will be held at the Fairmont Normal School, the most beautiful place available in Marion County.

Examination Dates.
For teachers' certificates (elementary, primary, supervisors, and high school), examinations will be held on June 1 and 2, and July 13 and 14.

Examinations on reading circle books and high school subjects will be held on June 3.

No other examinations of any kind will be held by the State Department of Education this year.

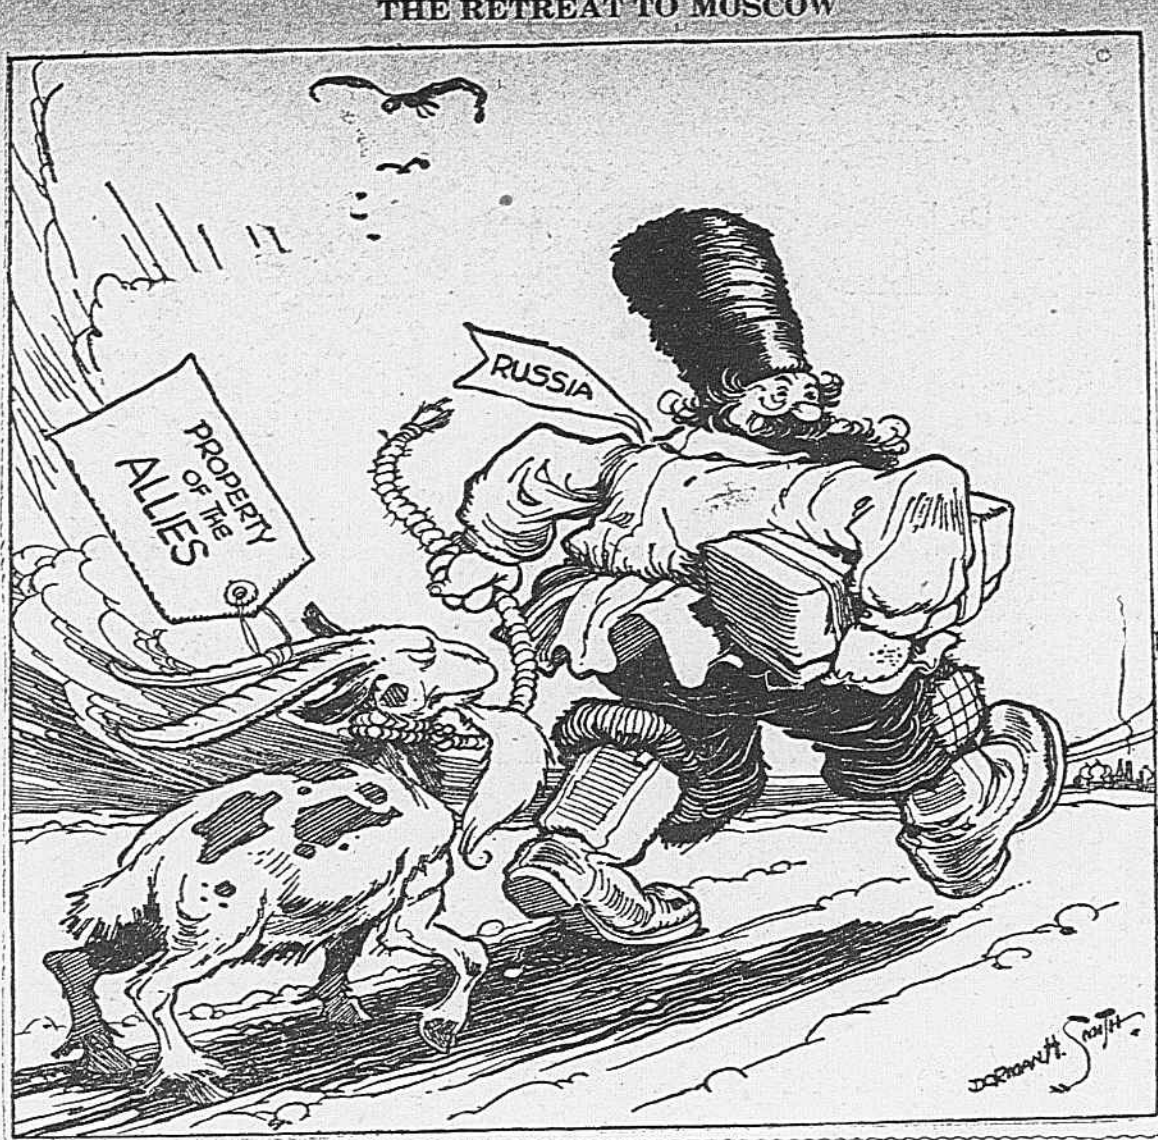

Enrollment.
All applicants should if possible enroll the evening preceding the examination. All applicants for any kind of a certificate should enroll on the prescribed enrollment card, teacher-training form No. 8.

Applicants for high school, supervisors or primary certificates should write the name of the certificate for which they are applicants on the margin at the top of the page.

General Regulations.
All applicants should be on hand promptly at the beginning of each session. In no case will an applicant be allowed to begin a subject after the manuscripts on that subject have been taken up. No applicant from another county who does not have written permission from the county superintendent of the county in which he resides will be admitted to the examination. No person who has a valid first grade certificate by examination can be an applicant or take any subject in another year when applying for renewal.

Substituting Grades.
Teachers who expect to substitute high school or normal school grades in lieu of examination on any subject must attach a certified statement of these grades to their enrollment card in either examination. The applicants must state definitely what substitutions they desire to make. A grade to be substituted in lieu of any subject in the teachers' examination must be the average grade for one year's work earned in a first class high school, normal school, college or an approved county summer training school.

Training Requirements.
To secure a first grade certificate an applicant must have at least four units of high school subjects and one unit of professional subjects. No credit of less than one-fourth unit will be given in any subject and no credit will be given

for less than one unit in any foreign language. All credits must be certified by the proper officials in the school in which it is done. If a person has fully qualified to be an applicant for a first grade certificate at the time he enters the examination, he must attach a statement of his high school and professional subjects to his enrollment card. If this work is not completed at that time, a statement must be sent to the State Department of Education as soon as possible, giving the county and place where the teachers' examination was taken. All certificates on examination will be issued before October 1, and in no case will credentials for a certificate be considered after this date.

Report of Grades.
The manuscripts of the June examination will be graded in reports for the first twenty-seven counties including Mason, will be sent out about four weeks after the examination and the others in about seven weeks. The Marion County grades will be announced in the first list. In the second examination, the manuscripts will be graded in the reserve alphabetical order and the report of the grades made in the second twenty-eight counties will be sent out first.

Regarding Papers.
When applicants are not satisfied with the grades given on any subject, the State Department of Education, upon recommendation of the county superintendent, will regrade such manuscripts. Application for regrading must be made before September 1. Applicants who have an average within one point of a higher certificate (69 per cent-79 per cent-89 per cent) when they receive their reports need not apply for a second grading as this will be done before the report is announced.

Certificate Requirements.
An average of 70 per cent must be made in a uniform teachers' certificate. An average of 80 per cent must be made in a uniform examination for a second grade certificate. First grade certificates may be had by making a examination, and applicant must have five units of high school and professional credits. A second grade temporary certificate is given for sixteen units of high school credits. First grade temporary certificates are given for sixteen units of high school credit and one unit of normal school credit. The minimum requirement for a short course certificate is thirteen and one-half units of high school credit and two and one-half units of teacher training subjects.

The requirements for a standard normal certificate are sixteen units of high school credit and sixty-four semester hours of normal school credit. The requirements for a high school certificate are sixteen units of high school credit and 128 semester hours of college credit, twenty hours of which must be professional. West Virginia does not validate teachers' certificates or licenses issued in any other state. However, all school work done in accredited schools of other states will be accepted toward meeting the requirements for any West Virginia certificate.

Examination Schedule.
June 1 and July 13: 8-8:30—assigning seats to applicants, announcements, etc. 8:30-10:15—United States and West Virginia History, one and three-fourth hours; 10:15-12—Arithmetic, one and three-fourth hours.
June 1 and July 13: 12-1:15—civil government, one and one-half hours; 1:15-3:45—theory and art of teaching, one and one-half hours; 3:45-5—physiology and hygiene, one and one-half hours.
June 2 and July 14: 8-9:45—English grammar and language, one and three-fourth hours; 9:45-11:15—agriculture, one and one-half hours; 11:15-12—spelling, three-fourth hour.
June 2 and July 14: 1-1:30—writing, one-half hour; 1:30-3:15—reading, one and three-quarter hours; 3:15-4:45—geography, one and one-half hours.

The schedule will be followed without any change or extension of time.

MARY GARDEN TO APPEAR IN CHICAGO NEXT YEAR

CHICAGO, May 24.—Mary Garden, Galli Curi and Giorgio Palacco, musical director will appear again in opera here next season, it was officially announced last night.

Among the tenors, it was stated will be forest Lamont, Tito Schipps Ulysses Lappasas, and Octave Dava. The name of Lucien Mura-tore, whose differences with Mary Garden last season attracted wide attention, was absent.

A statement that Palacco was to become director caused much interest. He is said to have differences with Miss Garden.

TO INVESTIGATE SINKING OF EGYPT

Women Passengers Pushed
Aside by Members of Crew
as Vessel Sinks.

PARIS, May 24.—(By The Associated Press.)—The government will be interpellated in the Chamber of Deputies on the circumstances surrounding the collision between the British steamship Egypt and the French freighter Seine, it was announced today by Deputy Guernier, president of the merchant marine committee of the chamber.

The two American missionaries, Mrs. M. L. Sibley and Miss V. M. Boyer, reported missing, are still unaccounted for, and no further bodies have been recovered.

While the white officers of the Egypt exhibited heroism and self-denial after the crash, as is shown by the large percentage of them missing, the Lascars of the crew, according to rescued passengers, lost their heads completely.

Mrs. Hansen told the Brest correspondent of the Paris Daily Mail that after she had been washed from the deck of the Egypt, a number of Lascars drove her from a capsized boat on which she tried to climb. Mrs. Taylor of Blackburn, England, told a similar tale.

The natives ran shrieking about the ship, pushing women aside and struggling with each other to get into the boats," she said. G. S. Duff of Dundee, Scotland, and other survivors also declared that the Lascars made a rush on the first boats to be launched. The passengers, they said, only got a chance at the last boat, and that by the intervention of Captain Carr, who prevented any from getting in until the women had found places.

The wood of 500 trees must be manufactured into paper to provide material for the publication of a novel that reaches the circulation of 25,000 copies.

NATIONAL COAL ASSOCIATION TO CONSIDER PLAN

Stabilization of Prices to Be
Discussed—West Virgin-
ians Re-Elected.

By U. H. DUNLAP

CHICAGO, May 23.—It is apparent that one of the chief matters of importance that will come before the fifth annual convention of the National Coal Association is the Hoover stabilization of coal prices. Sentiment appears to be growing toward the election of Alfred M. Ogles, Terre Haute, Ind., as the next president of the National Coal Association. Thus far no other names have loomed up.

A meeting of the railroad relations committee was held yesterday afternoon, at which the subjects discussed included those of operators repairing and clearing coal cars before loading them in times of care shortage, demurrage on coal awaiting billing, instructions coal loading and trimming, rules and dockets of coal and coke committees, E. C. Mahan, Knoxville, Ky., is chairman of the committee, and the members anticipated his selection again as chairman and passed a resolution of thanks. This was offered by W. L. Andrews, Baltimore, connected with the Consolidation Coal Co.

Directors had a meeting Tuesday afternoon but only routine matters were disposed of such as receiving correspondence from various outside organizations. The directors, C. H. Jenkins and George S. Brackett, Fairmont, attended the meeting.

West Virginians Re-Elected

Yesterday afternoon the West Virginia Coal Association re-elected these officers for the ensuing year: President, J. G. Bradley, Dunderberg, Va.; vice president, Everett Drennen, Elkins; secretary, Walter H. Cunningham, Huntington; treasurer, C. C. Dickinson, Charleston. Owing to the present strike and unsettled labor conditions it was deemed advisable to make a shift at this time. Owing to ill health, Quinton Morton resigned as a director of the National Coal Association and C. C. Dickinson, Charleston was chosen to fill out the unexpired term of one year. Suitable resolutions will be passed on the association's appreciation of Mr. Morton's services.

The members of the committee to prepare the resolutions are: D. C. Kennedy, Charleston; W. H. Cunningham, Huntington; C. H. Jenkins, Fairmont, and C. H. Mead, Beckley.

The association recommended

that Walter H. Cunningham, Huntington, be its choice for director-at-large of the National Coal Association. He will come up for election today. He is said to have the backing of Tennessee, Kentucky, West Virginia, and a portion of Indiana. J. J. Tierney, Philadelphia, with West Virginia mine connections was re-elected director of the National Coal Association from West Virginia. His plant is in the Smokeless Coal fields at Powhattan, W. Va.

Mr. Bradley, in his report of the activities of the National Coal Association, showed how during his administration that great economy has been practiced in the national body. The meeting passed a resolution of thanks for Bradley's faithful services.

Penna Not Optimistic

Phil Penna, Terre Haute, Ind., secretary of the Indiana Coal Operators' Association, who was once international president of the United Mine Workers of America and who has been dubbed the "Little Giant," says there is nothing new in Indiana.

"Nobody knows the outcome of the strike," says Penna. "People who talk that way don't know any thing about the situation. We have a closed proposition in Indiana due to the permit system of coal mining, an act of the legislature in Hoosier State requiring the utilization of experienced miners. This system is also in vogue in Illinois but does not apply in Ohio, Pennsylvania or West Virginia."

ARMY AVIATORS TO DESTROY FORTRESS

BALTIMORE, May 24.—Army aviators, having demonstrated what they can do to battleships will make their first attempt to blow a fort off the map here next Tuesday.

The demonstration, scheduled as a part of the fourth annual aircraft exhibition of the flying club of Baltimore, will be directed against a reproduction of Fort Carroll which workmen have been engaged in building for the last three weeks at Logan Field. Army air squadrons from Aberdeen, Md., and Langley Field, Va., will make the attack, using twenty-five pound high explosive bombs while screening themselves with smoke bombs. Efficiency tests for military and civilian fliers, spot landing contests and slow landing and stunt flying competitions are on the program. Fliers from New York, New Jersey, Pennsylvania and Virginia have entered.

"What can Henry Ford do with Muscle Shoals?" will appear in this paper, Friday.

Put It to the Severest Tests
You Can Think of

Experts in Domestic Science will convince you about Mazola

FREE COOKING SCHOOL AT HARTLEYS

OUR expert demonstrators will be at the Hartley Store all this week. Step in and let them prove to you the remarkable facts about Mazola. You could not spend an hour more profitably. Women's clubs, teachers organization, and high school domestic science classes especially invited. Bring pad and pencil and take notes during the lecture.

For many years you have been hearing about the remarkable economy of Mazola—how it can be used for every cooking and salad purpose. More than seven million American women have proved over and over again, that Mazola is richer and much more economical than butter in shortening for cake, pie crust and pastry. For Mazola is a 100% pure vegetable oil, and contains absolutely no water—as do butter and lard.

It is better than lard or ordinary cooking fats. Mazola never takes up flavors or odors—nor carries flavors or odors from one food to another. This is because it is heated to a higher temperature without smoking or burning than other cooking fats that the surfaces of the food are crusted over, and the rich juices are kept in.

This is why Mazola can be used over and over—until the last drop is gone—even after frying fish or onions. All you have to do is to strain it. Then you can use it for shortening the most delicate cake.

Many Italian and French people, who know the taste of good salad oil, prefer Mazola, even to the highest priced imported olive oil—it is so sweet and wholesome.
